$\qquad$

## MEASUREMENTS OF DIFFERENT OBJECTS

Choose the units to measure objects.
Circle the correct estimate for each object:
a) The height of a flag pole is more than / less than / about the same as the of a yard stick.
b) The width of a door is more than / less than / about the same as the length of a yard stick.
c) The length of a laptop computer is more than / less than / about the same as the length of 12 inch ruler.
d) The length of a cell phone is more than / less than / about the same as the length of a 12 inch ruler.

1) Name 3 things in your class room. Decide which unit you would use to measure that item. Record it in the chart in a full statement.

| Item | Unit |
| :---: | :---: |
| a) Height of the chair. | I would use $\qquad$ to measure the length or $\qquad$ of the teacher. |
| b) | I would use $\qquad$ to measure the length of edge of the black board. |
| c) | I would use $\qquad$ to measure the length of pencil. |
