ARRANGEMENTS OF ROWS AND COLUMNS

Compose arrays from rows and columns and count to find the total using objects.

1) Draw the birds and animals as columns of 5 as you like.

Solution:

The solution area for question 1 consists of two identical sets of three vertical lines. Each set is intended for drawing a column of 5 objects, such as birds or animals.

___ columns of 5 = ___

___ columns of 5 = ___

2) Draw the balls and frogs as columns of 4 as you like.

Solution:

The solution area for question 2 consists of two identical sets of four vertical lines. Each set is intended for drawing a column of 4 objects, such as balls or frogs.

___ columns of 4 = ___

___ columns of 4 = ___
