## PROBLEM SOLVING QUESTIONS

Solve using words, math drawing and number.

**Example:**

Rachel's father gave her some money. She spent \$4 for buying muffins and \$6 for buying chocolate. If she used all of her money. How much money was Rachel given?

**Words:**

Rachel spent \$4 on muffins.

Rachel spent \$6 on chocolate.

Altogether she spent \$10.

**Math drawings:**

Muffins:  = \$4

Chocolate:  = \$6  
            
  \$10  

**Numbers:**

$$\text{\$ } \underline{4} + \text{\$ } \underline{6} = \text{\$ } \underline{10}.$$

1) Karin has some money. She spent \$7 to buy a book and \$3 to buy a pencil. Karin spent all her money to buy the pencil and book. How much money did Karin has?

**Words:**

**Math drawings:**

Book: 

Pencil:
