

NAME _____

DATE _____

WORD PROBLEMS

Make a ten to add with in 20.

Example:

Melanie ate 5 chocolates on Monday and 9 chocolates on Tuesday. Jane ate 7 chocolates on Monday and 6 chocolates on Tuesday.

a) How many chocolates did Melanie eat in all?

$$7 + 3 = 10$$

$$10 + \underline{2} = \underline{12}.$$

$$\therefore 5 + 7 = \underline{12}$$

Melanie ate 12 chocolates in all.

b) How many chocolates did Jane ate in all?

$$9 + \underline{1} = 10$$

$$10 + 5 = \underline{15}.$$

$$\therefore 9 + 6 = \underline{15}.$$

Jane ate 15 chocolates in all.

1) Nicole used 8 crayons for one drawing and 3 crayons for another drawing. Alex used 9 crayons for one drawing and 10 crayons for another drawing.

a) How many crayons Nicole used in all?

$$8 + 2 = 10$$

$$10 + \underline{\quad} = \underline{\quad}.$$

$$\therefore 8 + 3 = \underline{\quad}.$$

Nicole used crayons in all.

b) How many crayons Alex used in all?

$$\therefore 9 + 10 = \underline{\quad}.$$

Alex used crayons in all.
