## SUBTRACTIONS

Solve the following by using the count on or take from strategy ten and tick (✓) on the strategy you used.

- 1) Tom has 18 muffins. His friends ate 9 muffins. How many muffins are left with John?

$$18 - 9 = \underline{\quad}$$

 Take from ten. Count on.

- 
- 2) In a playground, 16 children are playing. 9 children stop playing and went home. How many children are still playing in the playground?

$$16 - 9 = \underline{\quad}$$

 Take from ten. Count on.

- 
- 3) Mark has 14 toy robots. He is playing with 9 of the toy robots. How many robots are left?

$$14 - 9 = \underline{\quad}$$

 Take from ten. Count on.
