

NAME _____ DATE _____

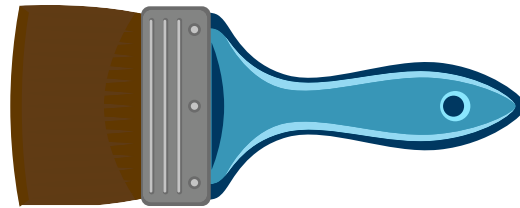

UNDERSTAND CONCEPTS ABOUT THE RULER

Connect measurement with physical units by using multiple copies of the same physical unit to measure.

Example:

Sara lined up her centimeter cubes to find the length of the picture of the paintbrush.

Sara thinks the picture of the paint brush is 5 centimeter cubes long.

Is her answer correct. Explain why or why not.

Solution:

Her answer is incorrect.

Explanation:

Because there are gaps between 5 centimeter cubes in measurement.

1) The crayon is ___ centimeters cubes long.

2) The pencil is ___ centimeters cubes long.
