## ADDITION OR SUBTRACTION

Subtract multiples of 100 and some tens within 1000. Solve each using the arrow way.

Example:

$$570 - 200 = \underline{370}$$

$$570 \xrightarrow{-100} 470 \xrightarrow{-100} \underline{370}$$

1)  $570 - 270 = \underline{\quad}$ .

$$570 \xrightarrow{-100} 470 \xrightarrow{-100} \underline{\quad} \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} 340 \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} 320$$
  
$$\xrightarrow{-10} \underline{\quad} \xrightarrow{-10} 300$$

2)  $570 - 290 = \underline{\quad}$ .

$$570 \xrightarrow{-100} 470 \xrightarrow{-100} \underline{\quad} \xrightarrow{-10} 360 \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} 340 \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} 320$$
  
$$\xrightarrow{-10} \underline{\quad} \xrightarrow{-10} 300 \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} 280$$

3)  $760 - 400 = \underline{\quad}$ .

$$760 \xrightarrow{-100} \underline{\quad} \xrightarrow{-100} 560 \xrightarrow{-100} \underline{\quad} \xrightarrow{-100} 360$$

4)  $760 - 460 = \underline{\quad}$ .

$$760 \xrightarrow{-100} \underline{\quad} \xrightarrow{-100} \underline{\quad} \xrightarrow{-100} \underline{\quad} \xrightarrow{-10} 360 \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} \underline{\quad} \xrightarrow{-10} \underline{\quad}$$
  
$$\xrightarrow{-10} \underline{\quad} \xrightarrow{-10} \underline{310} \xrightarrow{-10} \underline{300}$$
