

NAME _____ DATE _____

ADDITION OR SUBTRACTION

Choose and explain solution strategies and record with a written addition or subtraction method.

1) $360 + \underline{\hspace{2cm}} = 754$

Step - 1 :

My strategy:

$754 - 360$ is the same as $694 - 300$. (Subtracting 60 from both numbers)

H	T	O
6	9	4
3	0	0

Step - 2 (classmate strategy expected):

$754 - 360$ is the same as $694 - 300$

$694 \xrightarrow{-100} \underline{\hspace{2cm}} \xrightarrow{-100} \underline{\hspace{2cm}} \xrightarrow{-100} \underline{\hspace{2cm}}$

Explanation:

- In my view both strategies are easy.
- The student has to think to get the number into multiples of 100's in order to make the solution easy.
- Sum of the two numbers is 754.
- One number is given 360 so to find the second one we can subtract 360 from 754.
